

## Undergraduate Preparation for Year 11 and 13

Below are links to resources, activities and reading to help you prepare for study at university. We hope you find these useful over the next few weeks

### 1. UCAS

UCAS and the National Extension College have produced a series of study guides about key skills for academic study at university. These will be useful for all years as these will be the skills you will use during A Level and University study.

<https://www.ucas.com/undergraduate/student-life/study-skills-guides>

### 2. HE Plus

The website below offers links to a variety of degree areas with extra reading and activities. The content and complexity is at undergraduate level. It is very useful to prepare for your courses in the autumn if you are Year 13 or to find out about courses and university if you are Year 11 and thinking about going. It's aimed at all students who wish to study at university - not just Cambridge itself!
