

Activity 3 - Face Memory

 Read this article to learn about which facial features influence how well you remember faces. While reading this article, think about the links between face memory research and social psychology - the study of how people influence each other. <u>https://www.forbes.com/sites/rosspomeroy/2014/01/28/think-they-all-lookalike-thats-just-the-other-race-effect/#69eec6743819</u>

Everyone has a different ability to remember faces. Do you think you remember certain faces better than others? If so, which features of the face influence how well you remember it?

 Test your ability to remember faces here by taking the Cambridge Face Memory Test. <u>http://www.bbk.ac.uk/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psychology/psy</u>

Take a read of this quote from a person who is reflecting on his own ability to remember faces:

"As a boy, I watched *The Terminator* and *Aliens* with my father...I now remember him being amazed when I noticed that an actor – Bill Paxton – was in both films, even though he looked different in each role," Porritt told me. "But I didn't think too much of it at the time. I assumed everybody saw what I saw."

The author of this quote is now a senior police officer. How do you think he uses his superior face recognition skills in the police force?

 Take a read of this article to find out exactly how the police use this ability for superior face recognition. <u>http://www.newstatesman.com/politics/uk/2016/08/super-recognisers-scotland-yard</u>
